January 7, 2021 11:00am (PST)// 2:00pm (EST) **Assessment: Skin of Color**

Speaker: Tracy Rodgers RN, BSN LNCC, RN-CLTC, WCC, DWC, Clinical Instructor

Description:

Assessment and quantification of skin color is important to healthcare as color is one indicator of overall health. The ability to note changes in skin color can mean life or death. Professionals need to understand the skin's mechanism as it relates to ethnic differences, as well as unique skin-related challenges. This session will review structural, physiological, functional and cultural differences in skin of color, assessment techniques, common skin conditions and cutaneous complications.

Learning Objectives:

Distinguish the prominent differences between skin of color and Caucasian skin.

Identify characteristics of 3 or more common skin conditions in skin of color.

FEBRUARY 18, 2021 11:00am (PST)// 2:00pm (EST) **Palliative Wound Care**

Speaker: Tracy Rodgers RN, BSN LNCC, RN-CLTC, WCC, DWC, Clinical Instructor

Description:

This session will discuss the goals of Palliative Wound Management. Our approach to wound care is less aggressive, and we encounter many challenges. We'll discuss those challenges, which include: wound odor, excessive bleeding, exudate, necrotic tissue, pain, periwound breakdown, itching, and body image and caregiver skills. We'll learn about some of the wounds encountered in palliative care such as Kennedy Terminal Ulcer, Marjolin, Kaposi Sarcoma, fungating wounds, pressure ulcers, and fistulas.

Learning Objectives:

Outline the major goals of palliative wound management.

Describe various types of wounds and complications encountered in palliative wound management.

Identify interventions and products for wound treatment as they relate to palliative wound management.

MARCH 11, 2021 11:00am (PST)/2:00pm (EST) **Skin and Nail Changes in the Diabetic Foot**

Speaker: Dr. Donald Wollheim MD, FAPWCA, WCC, DWC, Clinical Instructor

Description:

Approximately half of all patients with diabetes will experience dermatological changes during the course of their disease. Recognizing changes and instituting prompt management plans can assist in prevention of diabetic foot ulcerations. This webinar explores characteristics and treatment plans for the most common skin and nail conditions frequently encountered on the diabetic foot.

Learning Objectives:

Name and explain characteristics of at least 3 common skin complications and 3 nail pathologies frequently seen with Diabetes.

Identify nail or skin changes in the diabetic patient that require prompt interventions or referrals.
